October 21, 2008

Greetings:

The National Energy Research Scientific Computing Center (NERSC) and the Computational Research Division at the U.S. Department of Energy's Lawrence Berkeley National Laboratory invite applications for the Luis W. Alvarez Fellowship in Computational Science.

The scientific staff at Berkeley Lab recognizes the increasing significance of computational and computer science—and the need to help educate students across the full spectrum of scientific computing. The Alvarez Fellowship allows recent graduates (within the past three years) with a Ph.D. (or equivalent) with a strong emphasis on computing or computational science to acquire further scientific training at one of the leading facilities for scientific computing and to develop professional maturity for independent research.

Enclosed is a poster with details of the fellowship and instructions on how to apply. I would appreciate it if you would display the poster as soon as possible so that students and recent graduates are aware of this exciting opportunity. The application deadline for this position is December 2, 2008.

For more information on the Luis W. Alvarez Postdoctoral Fellowship, please visit <http://www.lbl.gov/CS/html/alvarez.html>. For other currently available postdoctoral openings, please visit <http://www.lbl.gov/CS/Careers>.

Thank you for your help in publicizing the 2009 Alvarez Fellowship.

Sincerely,

*Marcia Ocon Leimer*
